

Performance in Initiating Clinical Research
70-day benchmark, valid application to first participant recruited

Trial Name	Research Ethics Committee Number	Date of receipt of a Valid Research Application (SSI)	Date of the recruitment of first patient	Reason for not achieving benchmark, if applicable
A pragmatic randomised double-blind trial of Antipsychotic Treatment of very Late -onset Schizophrenia-like psychosis: The ATLAS Trial	11/LO/1267	04/07/2012		Relying on new patients referred to the service, where the patient population is very small. Only one consultant in the Trust able to undertake study procedures due to study set up arrangements and no resource available from the lead site
Better Sleep Trial: a pilot randomised controlled trial for patients with delusions and/ or hallucinations.	12/SC/0138	23/07/2012	14/12/2012	Contract delays at NIHR resulted in NHS Permission delay and consequently sub-contract to employ therapists, therefore, delay to first patient recruitment.
A case series study to provide preliminary evidence for the effectiveness of Psychodynamic Interpersonal Therapy (PIT) in patients with Anorexia Nervosa.	12/SC/0323	27/07/2012	29/08/2012	
Interventional randomised, double-blind, parallel-group, placebo-controlled, exploratory study investigating the effects of LuAA21004 on cognition and BOLD fMRI signals in subjects remitted from depression and controls	12/SC/0213	12/07/2012	20/09/2012	
A randomised controlled test of reducing negative beliefs about the self in people with persecutory delusions: Improving self-confidence	12/SC/0369	26/07/2012	01/10/2012	
A pilot study and randomised trial of a multi-component mobile health based intervention compared with usual care to improve outcomes in chronic obstructive pulmonary disease.	12/SC/0437	08/10/2012	05/11/2012	
Examining whether virtual reality (computer environments) can help make people feel safer.	12/SC/0453	21/11/2012		Unforeseen delays in set up of the virtual reality lab has delayed recruitment
A double-blind, Placebo-controlled, Randomised, 4-week safety and Tolerability Study of LMTM in subjects with Mild to Moderate Alzheimer's Disease on Pre-Existing stable Acetylcholinesterase Inhibitor and/or Memantine Therapy	12/NW/0441	06/09/2012	01/03/2013	Initial delays due to unforeseen delay in IMP (investigational drug) supply to the Oxford site by the sponsor. This resulted in a delay in recruitment. Sponsor then withdrew study.
OXTEXT-7: Stepped wedge cluster randomised controlled trial of Feeling Well with True Colours for community patients in Oxford Health NHS FT: quantitative evaluation	13/SC/0070	11/06/2013	20/06/2013	
A randomised, double-blind, placebo-controlled, dose-ranging, parallel-group, phase 2 study of the safety and efficacy of ABT-126 in the treatment of cognitive deficits in schizophrenia (CDS) in non-smokers	12/SC/0544	06/03/2013	20/06/2013	Site Initiation Visit was delayed by the Sponsor, first recruit however was 56 days afterwards. Despite careful preparation this study is a challenge to recruit for.
Physical activity programmes for community dwelling people with mild to moderate dementia (DAPA- Dementia and physical activity)	11/SW/0232	20/03/2013	24/04/2013	
A randomised, placebo-controlled, parallel-group, double-blind, efficacy and safety trial of MK-8931 in subjects with mild to moderate Alzheimer's Disease	12/NE/0410	08/04/2013	15/05/2013
