

# What to do if you think you have **Corona Virus** or if you need to **see a doctor**, for another **health problem**

Phone your GP, **do not** go to the surgery.

Monday to Friday

If your **GP surgery** is **not open**

**Use 111 online** or by **phone**.

They will tell you if they need to see you or if they can help by talking to you on the phone.

You will be asked lots of questions about what is wrong.

This will help the Doctor work out how to help you.

If the Doctor needs to see you they might:

Ask you to go to your surgery.

Ask you to go to a special clinic.

Or visit you at home

The Doctors and Nurses, will be dressed differently to when you have been to the doctor before.

This is to try and keep you safe and stop the spread of Corona Virus.
