

Have you recently had a Pfizer or Moderna COVID Vaccine?

A few people have had mild heart problems after having the second dose of these vaccines. This is very rare.

Becoming very ill with COVID 19 is much more likely to happen than these side effects.

It is important that you still get both doses of the vaccine.

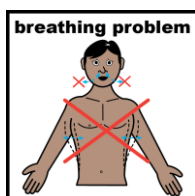

When you have had your vaccine . Make sure you get medical advice if you experience any of the following problems.

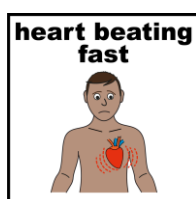

If you have any of these problems after your vaccine:

-Chest pain

-Shortness of breath.

-or feel your heartbeat is either much stronger than usual or that it is uneven.

If you have any of these problems, call 111 for advice.

If you feel very unwell call 999 and ask for an Ambulance.

If you are worried about having your vaccine please call your GP.

They will be able to help you to decide what is best for you.
