

Play, Conversation and Interaction // Aged 2 - 3

Provide children with opportunities to match toy objects or pictures to the real object. This could include sorting toys into boxes with matching pictures.

Encourage pretend play, with whichever toys the child most enjoys playing with. An adult may need to join the play to model pretend play ideas. Once the child is engaged with the play, follow their lead.

Encourage conversation by following the child's lead and talking about things that are of interest to them.

Make children aware when you have not understood them, and try to give them another chance to explain what they mean.
