

Play, Conversation and Interaction // Aged 1 - 2

Have fun experimenting with cause and effect using musical instruments, e.g., drums and shakers.

Cover a toy with a scarf and encourage your child to pull the scarf so they can find the toy.

Provide different sized containers and objects to play with. Together you can fill the container, empty it and then fill it again. Share enjoyment with the child using exaggerated facial expressions, and adding in a count to 3 before you empty the container.

At this age children will not always be able to take turns, but you can encourage this by joining in with their play, e.g. taking turns rolling the same car down a short slope, or taking turns playing a musical instrument. Keep the turns very short!
