

Play, Conversation and Interaction // Aged 1 - 2

Have fun experimenting with cause and effect using musical instruments, e.g., home-made drums and shakers.

Cover a toy with a scarf and encourage your child to pull the scarf so they can find the toy.

Give your child different sized containers and objects to play with. Watch your child fill the container, empty it and then fill it again.

Give your child opportunities to experience turn taking in games; they may not always be able to take turns but you can encourage this by joining in with their play, e.g. taking turns rolling the same car down a short slope, or taking turns playing a musical instrument. Keep the turns very short!
